HEAD OF THE NATIONAL EDU-CATIONAL ASSOCIATION.

As the first woman president of the Ella F. Young, the superintendent of schools of Chicago, has reason to feel that she is free from vanity and would have been a good loser had she lost.

She did not have the honor of having her name presented to the association by the nominating committee but she did have the privilege of seeing at first five male candidates for the presidency against her, and then when the strife was intense to see the male influence consolidate upon one man for her defeat. Although nominated upon the floor without any official backing she showed when the vote was taken that she had the pull, for she had two votes to the regularly nominated can-The Baltimore American, comment-

Our Surviving Indians.

The taking of the census among the indians in the United States has proved a less difficult task than had been expected. That has proved true, lespite the placing of an extra task upon the special agents—that of obtaining tribal data. These will be probably the last to be taken, since a lecade hence there will probably remain no Indians who are not citizens chloral, of chloroform and the thoupeople have access for temporary strength or forgetfulness. Taken by themseives, however, they show the rapidity with which the drug habit demonstrate the wreck which that habit makes in morals.

Those who fight liquor have not as yet recognized these agents of destruction which are doing as much of more harm than excessively used spiritions liquors; but the time is not far distant when the drug habit will be desit with by organized societies but also by stricter legislation and the enforcement of law in all the states of the union.

The customs receipts are showing that the revenue is wiping out deficits and creating surpluses.

Jecade hence there will probably remain no Indians who are not clitzens instead of department, when a wip in a later of department wards of the national government. As had been calculated from observation, the returns show a decrease in number in the decade ended in 1900. That decrease is from 273.607 to 266,750, or 2.5 per cent. But in 1850 the care of the fundings cost the government \$5,206,109; in 1898 that cost had increased more than three times, to \$15,524.162.

All the important is the evidence presented as to advancement in industry and education. The total attendance of Indian children in schools, both under government and missionary management, is 25,777. It is an interesting demonstrate the wreck which that hab-
